

# Suisun Marsh in the 21<sup>st</sup> Century: A Landscape of Change & Opportunity

Symposium presented by the Center for Aquatic Biology and Aquaculture (CABA)  
Sponsored by the Delta Science Program and the Center for Watershed Sciences

**Monday, May 23 • 9:00 AM – 12:15 PM**

UC Davis Conference Center • Ballroom B

- Stuart Siegel : Suisun Marsh Today**
- Amber Manfree : Historical Ecology of Suisun Marsh**
- Chris Enright : Challenges & Opportunities for Restoration at the Landscape Scale**
- Brenda Grewell : Marsh Vegetation: Ecology & Trends**
- Greg Yarris : Trends In Waterfowl & Other Birds**
- Teejay O’Rear : Aquatic Ecosystem Trends**
- Jim Starr : The Suisun Marsh Habitat, Preservation & Restoration Plan**
- Peter Moyle : Alternative Futures for Suisun Marsh**

Suisun Marsh, a large brackish wetland in the San Francisco Estuary, has been actively managed for conservation since 1976. Its potential to serve as a refuge for multiple species is increasingly important. This event will bring together regional experts to share information and discuss future management in an academic environment. Please join us for this free, informative event.

Morning seating will be limited to 112 people (first come first served). The presentations will be videotaped and posted online after the event at <http://caba.ucdavis.edu/seminars>.

There will also be an afternoon workshop to discuss topics in-depth. Space in the afternoon focus groups is limited to 48 people. Please contact Amber Manfree at [admanfree@ucdavis.edu](mailto:admanfree@ucdavis.edu) if you are interested in participating in a focus group.
